

Lowering Cholesterol Naturally

My Dr. is Taking Me off of Cholesterol MEDS!

I just had to tell you about my results with the Shaklee products, I am completely floored and so was my doctor. She had me go in last Monday to check my liver because I was on 10 mg of Lipitor. I knew that she wanted to increase my dose of Lipitor and suspected she would check my cholesterol while I was in there. So the week before I went in, **I kicked up the Shaklee Fiber Plan to 3x a day and took the Cholesterol Reduction Complex religiously.** Well...I went back today and got my results. The doctor had told me that the only way she wasn't going to increase my medication dosage was if it was reduced by more than 50 points but that a **typical result would be a reduction between 30/50 on the Lipitor alone.** Well my overall cholesterol went from **193 to 88.** I told her what else I was doing because she couldn't believe it! She said to stay on the Lipitor for 4 more months and then go off for two months and see how it looks only on the Shaklee products, and if it is okay, I can get off the meds. My cholesterol has been over 200 for years, I can't remember it ever being this low *Lisa C.*

Cholesterol and Triglycerides Down

I personally feel a need to share the information about this product because of my husband's experience. Previously, he was on a cholesterol medication. When he choose to use the **Cholesterol Reduction Complex** in October, 2010, results of his blood work in November, 2010 showed that his cholesterol had dropped from 230 to 151 and his triglycerides went from 252 to 140. The Product Works!

Pat Bolotin

Our Cardiologist is Very Pleased. . .

There is no story that I am happier to tell you than about my husband John's cholesterol. On 11/29/10 his total cholesterol in the Hudson Emergency Room was 234, HDL (good) cholesterol was 44 and his LDL (bad) cholesterol was 165. All 3 tests were out of the normal ranges. His cardiologist prescribed Lipitor, a cholesterol lowering statin with unacceptable side effects. Wisely, John refused to take Lipitor. Instead we modified our diets to lower sodium and lower fat, increased our fish intake, and we both take Shaklee Cholesterol Reduction Complex and Fiber Plan. This afternoon John saw his cardiologist who was VERY PLEASED with John's latest test results (12/29/10) Both test were done fasting. **Total cholesterol is now 185—a drop of almost 50 points in 1 month!** HDL (good) cholesterol is 50—increased by 6 points, and his LDL (bad) cholesterol is 119—down 46 points! All 3 tests are now within normal limits. John gave him the physicians letter about CRC written by Dr. Jamie McManus, MD, Chairman of medical Affairs, health Sciences and Education at Shaklee. He put it in his pocket to READ—he was that impressed and told John to keep doing what he was doing because obviously it's working! That's what I tell people all the time: Shaklee products work. What is on the label is exactly what is in the bottle. They do what they say they will do. It's the Shaklee Guarantee: the products always work, they are always safe and they are always green. I'm so very proud to be associate with Shaklee, a company with extremely high standards and impeccable integrity—a company who walks their talk.

Harriet Gushue, RN

Dear Friends,

The holiday season is here and we are thankful for all of our faithful customers who have continued to value the safety and high quality of the Shaklee products even during this challenging economy. As a personal note I wanted to share my testimony on the **Cholesterol Reduction Complex**. I have struggled with too high cholesterol for several years and never wanted to take a drug. I started taking the **Cholesterol Reduction Complex** in September and just got the results of my blood lipid test. It is very exciting!!!

	<u>April Test</u>	<u>Nov Test</u>
Total C	240	205
HDL	85	90
Chol/HDL	2.82	2.28
LDL	141	104
TRI	69	54

All I can say is WOW! Check out the **huge drop in LDL**. This is proof positive that this product works. I took 2 tablets twice a day. I finally bought a container to keep in my purse so I always had it with me. It says to take it ½ hour before eating but I usually take it just before I eat cause I can't remember ½ hour before. Can anyone relate? If you are struggling with your cholesterol, I highly recommend trying Shaklee CRC. *Margie & Jim*

LDL DROPPED

In late July my husband's cardiologist was beginning to talk "statins" which are not even an option here because of all the side effects, so James began taking the Cholesterol Reduction Complex in late July. In 3 ½ months, after taking the Cholesterol Reduction Complex, James LDL dropped from 145 to 116. His HDL increased from 63 to 78. his cardiologist is amazed! James is on no medication, only Shaklee vitamins and his doctor is wanting information on what he has been taking. His overall ratio went from 3.5 to 1.49. These are stunning ranges and in only 3 ½ months! *Lilli Hethrington*

Family History of High Cholesterol

Our family has a history of high cholesterol and I have been battling high LDL levels for quite a few years. My HDL has pretty consistently been in a good range, but I was very excited to begin using the Cholesterol Reduction Complex by Shaklee to see if it would reduce my LDL. I had my cholesterol checked shortly before I started taking it in August. I had it checked again this week and just got the results. I am please to report my LDL has already dropped from 180 to 150, almost 20% in just 2 months!! I told my doctor what I was doing and she told me that it takes a while for LDL to drop so advised me to be patient as it continues to drop even more! I am confident it will soon be in the normal range.

Barb Hill Behar

This STUFF WORKS!

My doctor called me this afternoon and gave me the cholesterol numbers from my blood test last Tuesday. My fasting status **Cholesterol went from 242 (in July) to 198. My HDL went from 50 to 58. My LDL went from 166 to 116.** I told him it was due to Shaklee's **New cholesterol supplement**. He said, "this stuff works". *Liz Hardy*

FDA approves health claims for Shaklee's new Cholesterol Reduction Complex!

Now there is a safe way to lower LDL (bad) cholesterol naturally! Shaklee's Cholesterol Reduction Complex (item #21219) is a proprietary formulation with clinically proven ingredients that help prevent the absorption of cholesterol and lower the LDL (Bad cholesterol). This is a major breakthrough for the millions of Americans who are challenged with high cholesterol. Take 2 tablets twice a day before a meal.
